EXPERIENCES

Dordogne – QA Producer – UMANIMATION (2022-2025)

- Production management : coordination of teams, monitoring project deadlines, assignment and prioritization of tasks.
- Internal and external QA supervision: build management and oversight of the Huwiz service provider (build preparation, test assignment, validation, feedback monitoring and analysis), detailed reporting.
- QA tool development in C#: workflow optimization, test automation, and initial analysis providing time savings for developers.
- Systems and asset integration: close collaboration with development and art teams on in-engine and gameplay system integration, and management of asset imports into the engine.
- Multiplatform QA experience (PC, Xbox, PlayStation, Switch, iOS) and multilingual support (14 languages).

Long Time A Girl (Interrupted) – Game & Level Designer – UMANIMATION (2024-2025)

- Game Designer (in close collaboration with Lead Game Designer Philippe Renouil): enhancement of existing systems, level design, and game design documentation.
- Unity project management: asset integration, gameplay mechanics adjustments, tool creation for workflow optimization, and testing under real-world conditions.

SIDE PROJECTS

PYLA – Level Designer – Unrevealed Studio (2024-???)

Unreal Engine 5: prototyped and refined level design layouts, and blueprint-based systems.

Distant Shore: Bretagne – Level Designer – Distant Shore (2023-???)

Unity 6 URP: created level designs, produced documentation, prototyped and refined layouts, and conducted testing.

FORMATION

BACHELOR Game Design & Creative Coding • e-artsup Bordeaux

RECOMMENDATIONS

Philippe Renouil (Senior Game Designer & Game Director – Shiro Games, UMANIMATION)

"Nathan worked for several years as a QA Producer, and I observed his seriousness and dedication every day. On his own initiative, he implemented numerous tools and processes to improve the working conditions of all team members. [...] Thanks to his passion for culture in general and for video games in particular, he demonstrates great creativity, especially in level design."

Rémi Conejero (Lead Producer – UMANIMATION)

"Nathan distinguished himself by his seriousness and professionalism. Among his key responsibilities, he managed data collation, maintained and updated the teams' task databases, handled priority management, and led team management."
